

## Custom Learnings

Day 22

## Azure DevOps

Create epic, features, user-stories and tasks:

The screenshot shows the Azure DevOps Kanban board for the 'IDA\_SHELL Team' in 'Iteration 1'. The board has five columns: 'New', 'Active', 'Resolved', and 'Closed'. On the left, there is a 'Collapse all' button and a list of user stories. The 'New' column contains three items:

- 8** As a registered user, I want to be able to update my profile information. (Unassigned, New)
- 10** Design the user profile page (Unassigned, New)
- 11** Implement the ability to edit profile details (Unassigned, New)

Below these items is a green '+' button. The 'Active', 'Resolved', and 'Closed' columns are currently empty.

The screenshot shows the Azure DevOps Kanban board for the 'IDA\_SHELL Team' in 'Iteration 2'. The board has five columns: 'New', 'Active', 'Resolved', and 'Closed'. On the left, there is a 'Collapse all' button and a list of user stories. The 'New' column contains three items:

- 14** As an international user, I want the app to be available in multiple languages (Unassigned, New)
- 16** Identify languages to support (Unassigned, New)
- 17** Translate app content into selected languages (Unassigned, New)

Below these items is a green '+' button. The 'Active', 'Resolved', and 'Closed' columns are currently empty.

Create a main branch and add a json file into it. Create the feature branch, add the files into it from the main branch, then do the changes in the code and pull the request. Merged it with the main branch, then code changes in feature branch will be reflect into main branch.
